EDLA-Certified Device

I. Certification Overview
This device has been certified under Google EDLA (Enterprise Device Licensing Agreement), meeting Android enterprise-level compatibility and security standards. It comes with legally pre-installed Google Mobile Services (GMS) and supports the Google Play Store and enterprise-level management features.

EDLA certification is reviewed and issued by Google. It is an essential qualification for devices entering mainstream global enterprise markets and ensures continued access to security updates and ecosystem support.

II. Significance of Certification
Global Market Access: EDLA is one of the required qualifications for entering mainstream enterprise markets in Europe, the Americas, and Asia-Pacific.
Security and Updates: Devices receive ongoing Google security patch updates, reducing the risk of data breaches and system vulnerabilities.
Ecosystem Integration: Natively integrates enterprise applications such as Google Workspace and Microsoft 365, meeting office collaboration needs.
Official Endorsement: Reviewed and issued by Google, it serves as important proof of product compliance and quality.

III. How to Verify Certification
Step 1: Visit Google's official certified device list page:
https://storage.googleapis.com/play_public/supported_devices.html
Step 2: Press Ctrl + F (Command + F on Mac) to open the search box.
Step 3: Enter the device brand or model keyword (e.g., ETTO) to search.
If the corresponding device appears in the list, it indicates that it has been officially certified by Google.
A QR code linking to the above URL may be generated and placed below for customers to scan and verify.

IV. Notes
The query link is Google's official publicly available list. The data is updated in real time; please refer to the results displayed on the page.

Google has specific guidelines for the use of the EDLA certification mark. Before official external use, please confirm the logo assets and usage requirements in the authorization documents.

This document is intended solely for displaying certification information. The specific certification scope and terms shall be subject to Google's official authorization documents.
